

River Kelly  
CSCI-366  
Unix Command Line Homework  
Due: Feb 5, 2021  
Date: Feb 1, 2021

-----  
Instructions  
-----

Take the command line script that I demonstrated at the end of the Linux Command Line lecture & modify it to count all the code in the C and header files (ending in .c and .h) in your project.

(in the battleBit directory)

You can just submit the text of the command line script as well as the results

-----  
Response  
-----

```
$ find . | grep "\./battlebit/srcV.*\.[hc]$" | xargs wc -l
 26 ./battlebit/src/main.c
  1 ./battlebit/src/helper.h
 42 ./battlebit/src/game.h
 21 ./battlebit/src/repl.h
 19 ./battlebit/src/helper.c
 34 ./battlebit/src/char_buff.h
 86 ./battlebit/src/game.c
 65 ./battlebit/src/char_buff.c
 22 ./battlebit/src/server.h
 62 ./battlebit/src/server.c
117 ./battlebit/src/repl.c
495 total
```
